#6 – include issue number and issue title in generated markdown

Reported by @UnquietCode
Milestone: Version 1

In addition to the issue description, generate markdown for the issue number and title. Use an n-dash (–) rather than a hyphen.

Example markdown:

```
\# \#6 –Issue Title
Issue Description
```

which renders as:

#⁠6 – Issue Title

Issue description...

The dashes look the same to me in VSCode. I copied the unicode symbol and then did a regex to replace en-dash with '–' and 'em-dash' with '—' (the respective latex keys for them).
